

How to Read a QR Code

1. Open the Camera App on your phone or other device
 2. Point the Camera at the QR Code
 - a. a. See a link?
 - b. If not, tap the Camera screen
 3. Tap the Link that appears
 4. You should reach the information provided
-

If your device's camera doesn't automatically read the QR code and bring up a link, you can install a QR Code-reading app on your device.

1. Open your App Store or Play Store
 - a. Search for a QR Scanner (or QR Reader)
 - b. Tap Kaspersky QR Scanner or another with good ratings
2. Follow prompts and install app
3. Tap icon to open app and point phone at the QR Code
4. Tap the Link that appears in order to reach the information provided
